BLK-34C LOT-9 Bangay-ngay Street, Caloocan City.

## EDUCATION

**Bachelor of Science Information Technology**

**Technological Institute of the Philiippines**

2011 - 2015

## SKILLS

- Laravel 8, 9 ,10
- Codeigniter
- Wordpress
- MySQL, PostgreSQL
- Javascript
- JQuery
- Bootstrap 3,4,5
- Photoshop
- GIT/JIRA
- HTML/CSS
- Vue Js
- React Js
- Node Js
- Shopify

## WORK EXPERIENCE

### JR. WEBSITE DEVELOPER

**PINKLESTAR INC. OCTOBER: 2015 - FEBRAURY: 2016**

- Built custom themes from scratch and extended existing themes based on business requirements.
- Developed custom plugins and integrated third-party APIs to enhance functionality.
- Translated UI/UX designs into pixel-perfect, fully responsive websites.
- Improved website speed and performance by optimizing database queries, implementing caching systems, and minimizing CSS/JS assets.
- Achieved higher performance scores through Core Web Vitals optimization.
- Configured XML sitemaps, robots.txt, and canonical structures to enhance indexing.
- Integrated secure payment gateways (Stripe, PayPal) and optimized checkout flows to reduce cart abandonment.
- Implemented security best practices including firewall setup, malware scanning, and brute-force protection.

### WEBSITE DEVELOPER

**MPOTECH DIGITAL INC. FEBRAURY: 2016- MARCH: 2019**

- Designed and developed scalable web applications using Laravel and CodeIgniter following MVC best practices.
- Built secure RESTful APIs to support web and frontend applications.
- Implemented authentication and authorization systems (JWT, role-based access control).
- Optimized queries using Eloquent ORM and improved application performance.
- Integrated REST APIs and handled asynchronous data with Axios or Fetch.

### WEBSITE DEVELOPER

**ZAPPORT SERVICES INC. MARCH: 2020 - MARCH: 2023**

- Design and optimize relational databases using MySQL, PostgreSQL
- Develop, maintain, and enhance web applications using backend frameworks such as Laravel, CodeIgniter, or Node.js.
- Manage deployment processes, including setting up CI/CD pipelines using tools like GitLab CI, or GitHub Actions.
- Develop reusable components and maintain state management in React.js applications.
- Build dynamic and responsive user interfaces using React.js, JavaScript, HTML5, and CSS3.
- Develop RESTful APIs and integrate third-party APIs and services.
- Implement secure authentication and authorization systems (JWT, OAuth, session-based authentication).
- Integrate frontend applications with backend APIs efficiently.
- Deploy applications to hosting platforms or cloud environments.
- Manage Git repositories and follow version control best practices.

### SR. WEBSITE DEVELOPER / PROGRAMMER

**WOODFIELDS CONSULTANTS INC. MAY: 2023 - MARCH 2025**

- Architected and developed scalable full-stack web applications using Laravel, Vue.js, React.js, and Bootstrap, delivering responsive, high-performance, and user-centric interfaces.
- Designed and implemented secure API authentication and authorization systems using Laravel Passport, Laravel Sanctum, and OAuth 2.0, ensuring enterprise-grade security and token management.
- Integrated and managed third-party services, including Microsoft 365, and configured Azure Active Directory (AAD) for secure application registration and management of delegated and application-level API permissions.

- Implemented Single Sign-On (SSO) solutions with Microsoft Accounts using Laravel Socialite and custom OAuth flows, improving authentication efficiency and user experience.
- Designed and built RESTful and modular APIs using Node.js, implementing clean architecture principles and reusable service layers.
- Integrated third-party APIs and microservices while ensuring fault tolerance and proper error handling.
- Streamlined database operations using advanced Eloquent ORM techniques, including dynamic relationships, query scopes, and data transformations.
- Architected and developed scalable full-stack applications using React.js and Vue.js for dynamic, high-performance frontend interfaces integrated with Node.js backend services.
- Developed responsive, component-driven user interfaces using React (Hooks, Context API) and Vue.js (Vuex/Pinia, Composition API).

## WEBSITE DEVELOPER

**TOOVEM PHILIPPINES OPC . MARCH: 2025 - NOVEMBER 2025**

- Evaluating code to ensure it meets industry standards, is valid, is properly structured, and is compatible with browsers, devices, or operating systems.
- Develop, customize, and maintain Shopify themes using Liquid, HTML, CSS, JavaScript, and Shopify's Theme Architecture.
- Convert Figma/Adobe XD/Sketch designs into fully responsive Shopify themes.
- Implement theme extensions, custom templates, and dynamic content based on business requirements.
- Customize existing Shopify themes based on client needs (UI changes, layout adjustments, new sections, integrations).
- Improve store loading speed, minimize render-blocking scripts, optimize images, and reduce unused code.
- Analyze performance issues via Shopify Analyzer, PageSpeed Insights, Lighthouse, and apply optimizations.
- Build custom WordPress themes from scratch using PHP, HTML, CSS, JavaScript, and WordPress template hierarchy.
- Customize premium themes (Elementor, Divi, Astra) to meet design or functional requirements.
- Integrate SEO plugins, caching plugins, security plugins, and page builders.
- Optimized WooCommerce and Shopify payment workflows to reduce cart abandonment and improve transaction success rates.
- Implemented secure payment gateways and solutions in WooCommerce and Shopify, including PayPal, Stripe, and credit card processors.

## SYSTEM PROGRAMMER

**MANILA CENTRAL UNIVERSITY . APRIL: 23, 2026**

- Developed and maintained a university chatbot system using React.js, Node.js, Express.js, MySQL, Ollama, and Qdrant vector database
- Created an embeddable chatbot widget that can be deployed across different university websites with scope-based access and token validation.
- Integrated Ollama LLM to generate natural-language responses grounded in official university documents.
- Developed Node.js and Express Rest API and implemented JWT authentication.
- Designed, developed and deployed the MCU Strategy Scoreboard, a web-based system for tracking the university's strategic goals, KPIs and projects across departments for the Executive Committee (ExeCom).
- Integrated with Microsoft 365, using Microsoft Graph to read and update a live Excel workbook on SharePoint, so the system and the Excel file stay in sync.
- Deployed and maintained the system on an Ubuntu Linux production server, using Nginx as a reverse proxy over HTTPS and systemd for automatic restarts. Managed Git-based deployments with deploy keys
- Designed and built a full-stack kiosk feedback system end-to-end, used across multiple MCU campus locations to collect real-time satisfaction ratings via a tablet-based voting flow.
